

Installing Jing

How to install Jing onto your computer.

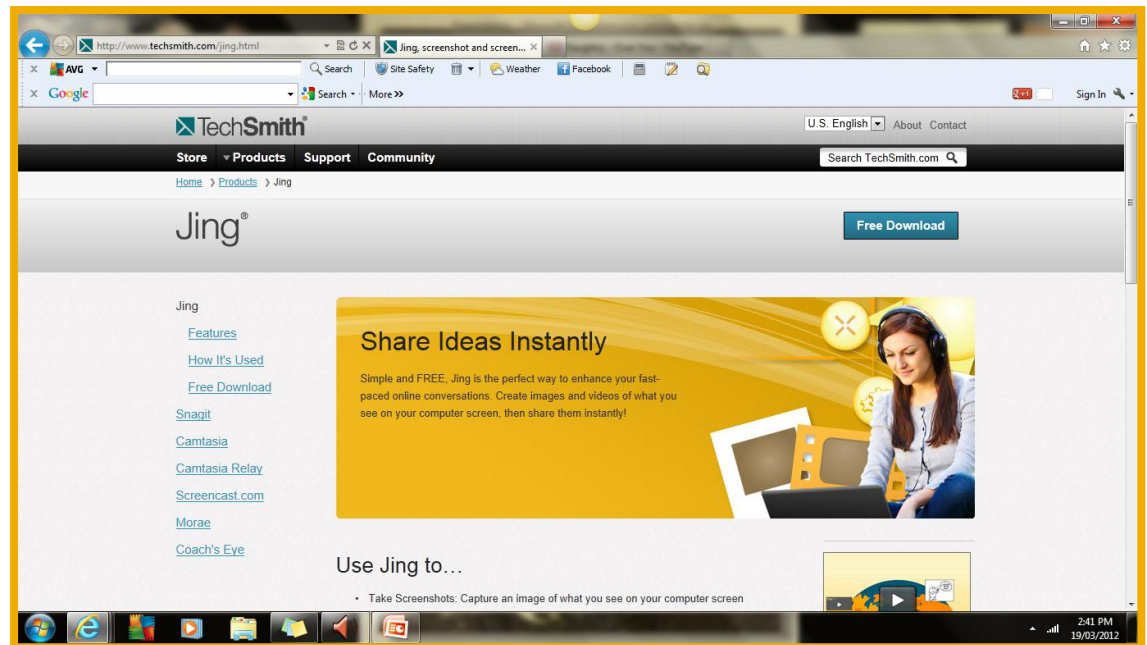

By Amy Agnew

Step 1: Finding the website

Click on the link below and follow the steps along with me.

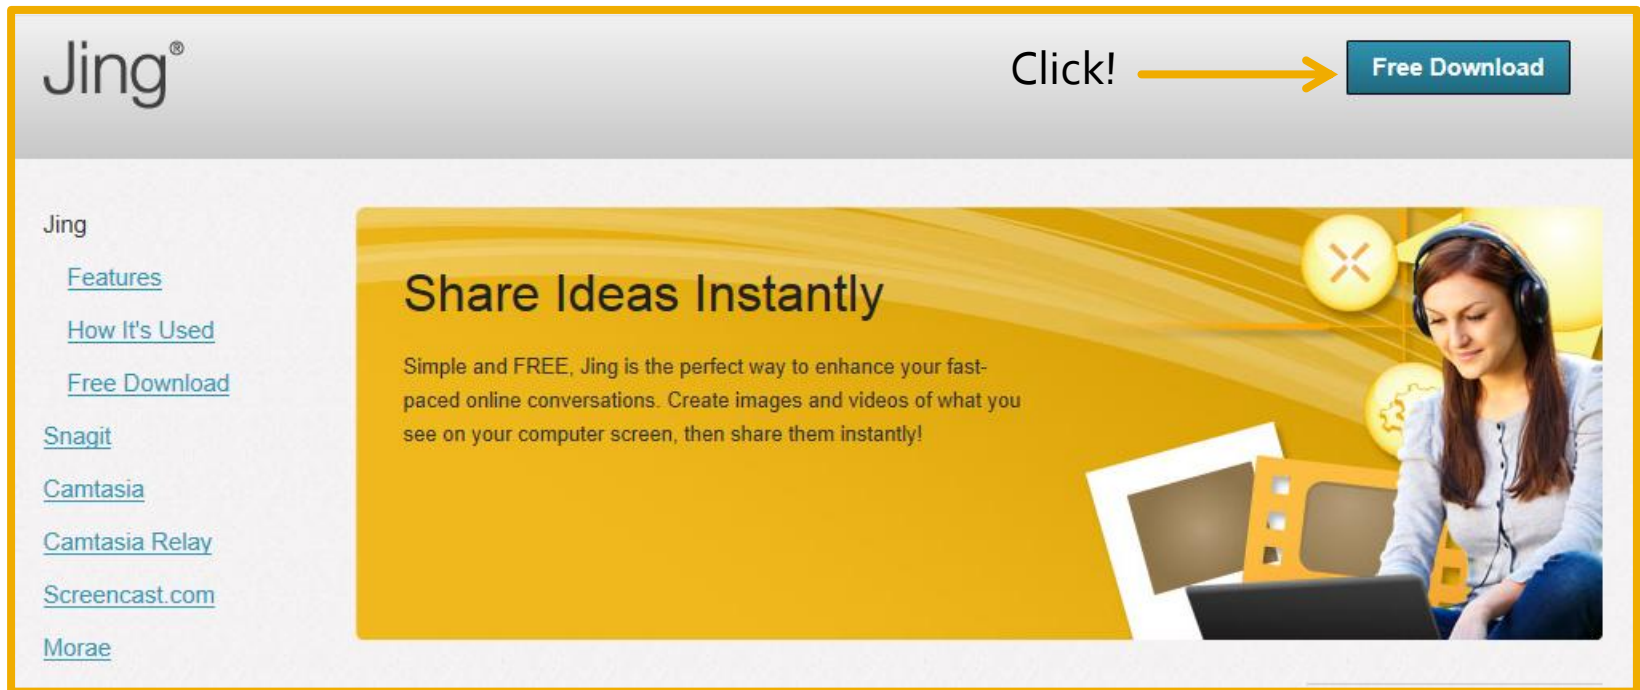

<http://www.techsmith.com/jing.html>

So for the first step, by following the link you should have come to the webpage that looks like this.

Step 2: Start the download

Now to begin the download click on the free download button that is available on the website.

The screenshot shows the top navigation bar of the Jing website. On the left is the 'Jing' logo. On the right, the text 'Click!' is followed by a yellow arrow pointing to a blue button labeled 'Free Download'. Below the navigation bar is a sidebar with several links: 'Jing', 'Features', 'How It's Used', 'Free Download', 'Snagit', 'Camtasia', 'Camtasia Relay', 'Screencast.com', and 'Morae'. The main content area features a yellow background with the heading 'Share Ideas Instantly' and a sub-headline: 'Simple and FREE, Jing is the perfect way to enhance your fast-paced online conversations. Create images and videos of what you see on your computer screen, then share them instantly!'. An image of a woman wearing headphones and working on a laptop is visible on the right side of the main content area.

Step 3: Download Choice

Now to select which version you need.

- PC – Select Start Windows Download
- Mac – Select Mac Download

I have a PC, so for this we will do the PC download type.

The screenshot shows the Jing website's download page. At the top left is the 'Jing' logo. The main heading is 'Download Jing for Free'. Below this is a short paragraph describing the software. At the bottom, there is a section titled 'Choose a version of Jing to download:' which contains two buttons: 'Start Windows Download' (highlighted with a yellow oval) and 'Start Mac Download'.

Jing®

Download Jing for Free

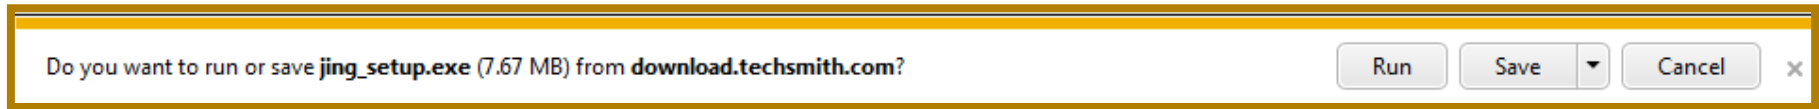

The always-ready program that allows you to instantly capture images and videos—then share them with anyone. Jing is a great tool for adding basic visual elements to all of your online conversations.

Choose a version of Jing to download:

[Start Windows Download](#) [Start Mac Download](#)

Step 4: Begin Download

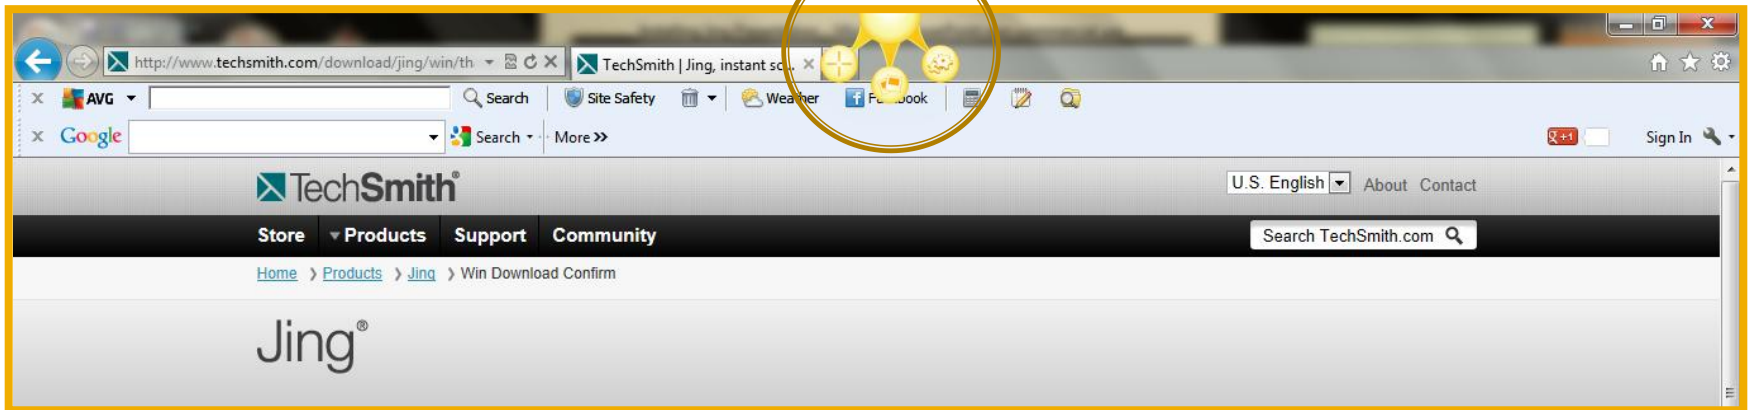

Beginning the download is similar to any other download you make on your computer. It should come up with something similar to the below image.

From this position just select run, follow instructions and accept terms and conditions.

Step 5: Installed

And you should now have Jing installed onto your computer. For PC it will appear at the top of your screen and for Mac it will appear to the right hand side of your screen.

And you have now just installed your own Jing.

Step 6: Completed

All the steps are now completed so have a play around with it, learn how to use it and check out the tutorials.

The screenshot shows the Jing website's 'Next Steps' section. At the top left is the 'Jing' logo. Below it, the text reads 'Thanks for downloading Jing!' followed by a link: 'Download didn't start automatically? [Click here.](#)'. Under the heading 'Next Steps', there are two numbered items. Item 1 is 'Sign up for our newsletter', accompanied by an image of a newsletter and the text 'New tutorials, tips and user stories in your inbox every month.' with a link 'Sign up now >'. Item 2 is 'Get started with our free training', which includes the text 'Jing comes with free, online tutorials. So you'll be working smarter and faster - sooner.' and a link 'Watch Tutorials >'. To the right of this text is an image of a laptop displaying a video player with the title 'Taking Your First Capture' and the Jing logo. A yellow arrow points from the word 'Tutorials' in the top right corner of the page to the 'Watch Tutorials >' link.
